COMPLETED PROJECTS

D-App

- Developed a delivery app for riders, enabling package tracking, efficient routing, note addition, and notifications. Utilized Angular framework for an intuitive user experience.

E-commerce Website for Mobile Store

- Created mobile store e-commerce platform with an admin panel. Angular frontend, Node.js backend, and MySQL database powering fundamental e-commerce features and payment gateways

Database Synchronization

- Led an in-house project aimed at synchronizing database structures, forms, and views, enabling alteration on the target database.
- Implemented using .Net framework and MSSQL.

AR-Integrated Furniture Store

- I orchestrated a mobile-centric e-commerce platform featuring AR functionality, Angular frontend, Node.js backend, and MySQL database. This highlighted prowess in UI/UX, backend, AR integration, and scalable solutions.

Ceilao Android App

- A Vehicle Rental Application with User, Booking and other management systems.
- Built with Java, Android Studio, and Firebase.

Consultation Application

- An android application to view and manage appointments .
- Developed with React Native.
- Database : Firestore

Smart Shoppers Inventory Application

- IOS Application to add products, manage quantity and track inventory.
- Developed with React Native.
- Database : Firestore
